

# GasStats Database

## Ed 1 2006

### Introduction

- For the first time ABS has drawn together basic data for the global gas markets from proprietary ABS sources and combined these with official statistics of Natural Gas, LNG and LPG to provide a statistical portrait of the gas sector in every country
- ABS GasStats contains 40 sets of data, 36 sets of snapshot data for the year 2005 and four historical series from 1965/1970/1980 to 2005 for the gas sector for 179 countries
- Market statistics about the gas industry, number of gas customers, numbers of utilities by function, transmission and distribution pipeline lengths
- Operational and technical industry statistics of Natural Gas, LNG, and LPG
- Economic and population statistics
- **ABS GasStats contains data from proprietary ABS databases compiled from original research and not separately published before in database form, as well as data for natural gas, LNG and PLG from a variety of national and international official published sources**
